

Announcing...

Paul Hoffmann

KSE

Vice President

Special Inspections and Material Testing

KS Engineers, P.C. (KSE) is pleased to announce that Mr. Paul Hoffmann has joined KSE as a Vice President, and is in charge of the firm's new Special Inspections and Material Testing Department. He brings a seasoned team of professionals for these critically needed quality assurance services, augmenting the resources of KSE with his experience and that of the personnel who provide these services.

Mr. Hoffmann has more than 20 years of experience in overseeing Special and Progress Inspections, material testing, disaster recovery, emergency response and building code construction compliance. His leadership in Special Inspection & Material Testing has made him the market leader, developing new business and managing contracts with construction values of \$100 billion dollars in New York, Philadelphia, and Puerto Rico, with clients in every market sector: public and private vertical construction, education, residential, parks, airports, transportation hubs, commercial office towers, hospitality, public housing, healthcare, police and emergency stations, higher education, cultural centers, private schools, transportation, waterfronts, public water, security centers, and more. He has extensive experience working with public agencies and authorities, and often with their private partners, in the expansive New York market. He has in-depth knowledge of all relevant building codes, conflicts of interests, standards, and inspectors' qualifications/certifications, and significant success in resolving complex construction compliance issues, most importantly creating a work environment with building owners and contracting stakeholders that keeps projects on time, on budget, and safe for occupancy.

Clients with whom Mr. Hoffmann has worked include the PANYNJ, NYCSCA, the Mayor's Office of Housing Recovery, NYCDDC, NYCEDC, Delta, Drexel University, LGA Roads, Silverstein Properties, Hudson Park & Boulevard, Brandywine REIT, BRP Companies, NYCDEP, Oxford Properties, Philadelphia Water Department, the Newark AirTrain, WTC Downtown Redevelopment, JFK Runways, DPR, Hudson Yards - Related Companies, The Hub at WTC, and many others. He has recruited, developed certification programs for, and managed hundreds of inspectors, project managers, material testing lab technicians, and administrative staff to support this client base.

Mr. Hoffmann is an active member in New York business construction, development, and design community groups, including the New York Building Congress, ABNY, ACEC, REBY. He also serves on the Board of the Technical Advisory Council of the International Accreditation Service (IAS). He can be reached at 646.510.2508, or by email at phoffmann@kseng.com.
