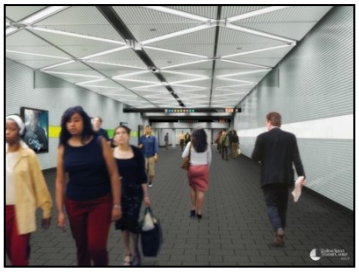
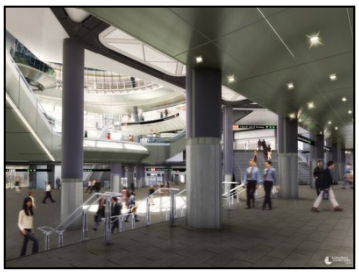
PROJECT NAME
CM-1256 Construction Management for the Fulton Street Transit Center in New York City

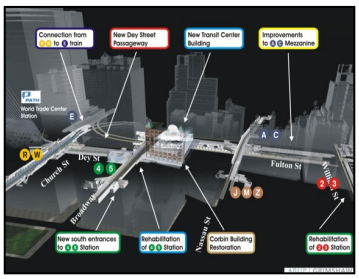
PROJECT OWNER
MTA New York City Transit

PROJECT CLIENT
PB/Bovis J.V. - CCM

START/END DATES
2004 – Present







PROJECT DESCRIPTION
KS Engineers, P.C. (KSE) provided construction management services for this mega project. KSE's services included document control and construction inspection.

The Metropolitan Transportation Authority and MTA Capital Construction are building a new Fulton Street Transit Center in the general vicinity of Fulton Street and Broadway, incorporating six existing Lower Manhattan subway stations:

- Fulton St 2 3
- Fulton St 4 5
- Broadway-Nassau St A C
- Chambers St-WTC E
- Fulton St J M Z
- Cortlandt St R W

The FSTC project will improve access to and connections between 12 subway lines for hundreds of thousands of daily commuters and Lower Manhattan residents and visitors, and will link NYC Transit facilities with PATH service and the World Trade Center site. Construction of the Fulton Street Transit Center is underway and parts of the new station have already been opened for commuter use.
