Restore Philadelphia Corridors Streetscape Improvement Project

Philadelphia, Pennsylvania

PROJECT NAME

Restore Philadelphia Corridors, Streetscape Improvement Project

PROJECT OWNER/CLIENT

Philadelphia Industrial Development Corporation

START/END DATES

2007 – 2011

PROJECT DESCRIPTION

KS Engineers, P.C. (KSE) was responsible for providing surveying and engineering services for a variety of streetscape improvements, including traffic calming, pedestrian lighting, and improvements to surface features, sidewalks, curbs, striping, landscaping, etc.

The following streets were included in this project:

- 22nd Street from Lehigh Avenue to Allegheny Avenue
- 52nd Street from Baltimore Avenue to Arch Street
- Intersection of Broad Street and Passyunk Avenue
- Intersection of Kensington and Allegheny Avenues
- Cecil B. Moore Avenue from Broad Street to 19th Street
- Landsdowne Avenue from 55th Street to 64th Street

KSE prepared a conceptual design for each of the above corridors within the limits indicated. Final design, construction documents, and construction administration were provided for portions of each corridor based upon the approval of the Philadelphia City Council. Each corridor was the subject of an intensive community outreach program.

52nd Street and Chestnut Street
