Transportation

KS Engineers, P.C. (**KSE**) has served the transportation industry for more than 20 years. With a reputation as a high quality provider of engineering solutions, **KSE** offers context sensitive solutions while meeting the needs of our clients and the traveling public relying on them.

Our talented professionals offer a thoughtful approach based on extensive experience. From highways and bridges to rail and transit, **KSE** can mold a project from initial planning and studies; to survey and design; to resident engineering and inspection; to construction.

Newark Light Rail Design & Construction Support
[NJ TRANSIT]

From Interstate *highways* to local *roadways*, **KSE** has an eye for affecting the evolution of these community lifelines as the population continues to expand further away from the central metropolitan areas.

KSE specializes in numerous types of *bridges* and transportation *structures* including complex, simple, movable, long-span and railroad bridges. The firm offers various services from design to inspection for these and other structures such as *tunnels*, *sign structures* and *light towers*.

Rail and *transit* customers are unique; so meeting the needs of these clients requires a keen understanding of end-user expectations. **KSE** has extensive experience with projects including urban transit; commuter rail; freight rail; yards and shops; bridges, viaducts and trestles; park & rides; and passenger stations and facilities.

Understanding how traffic flows is essential to the success of any project, and it changes according to the time of day and time of year. **KSE** has worked on numerous projects requiring traffic engineering and management. With experience spanning from traffic studies to signal design to MPT plans, **KSE's** professionals are well-versed in the traffic issues of the area and have the proven ability to streamline this contentious aspect for any project.

Design & Construction Management for Traffic Signal Improvements [Hudson County]

KS Engineers, P.C.
